IN THE MATTER OF QWEST CORPORATION'S FILING AMENDED RENEWED PRICE REGULATION PLAN	DOCKET NO. T-01051B-03-0454 **NOTICE OF FILING REVISED UPDATED EXHIBITS C, E AND F TO THE RENEWED PRICE REGULATION PLAN**

Pursuant to Arizona Corporation Commission Decision No. 63487, Qwest Corporation gave notice and filed its Renewed Price Regulation Plan in the above-captioned docket on July 1, 2003. An Amended Plan was subsequently filed on September 26, 2003. Notice is hereby given that Qwest is filing herewith updated Attachments C, E and F to that Renewed Price Cap Plan. These attachments have been revised to include the restatement impacts that were not available at the time of the original filing

RESPECTFULLY SUBMITTED this 23rd day of January, 2004.

FENNEMORE CRAIG

Productivity

At page 5 of Decision No. 63487 in Qwest's Rate Case, the Commission explained:

> The Price Cap Plan provides that Basket 1 Services will be capped and subject to an "Inflation minus Productivity" indexing mechanism. Thus, when productivity exceeds inflation, rates will decrease. The Productivity Factor for the initial term of the plan is 4.2 percent, which includes a 0.5 percent consumer dividend.

The 4.2 percent annual productivity factor was a compromise to the respective positions of the parties, and included 0.5% consumer dividend.[1] The productivity factor used in the Settlement Agreement was based on an analysis of Qwest's historic Arizona productivity during a four-year period from 1995 to 1998.[2] Using the same method used to calculate the productivity factor used in the Settlement Agreement Qwest's average annual Arizona productivity during a four-year period from 1999 through 2002 has been [redacted] percent.

The calculation of Qwest's productivity from 1999 through 2002 is found in Confidential Attachment B. The computations in Confidential Attachment B rely on financial information that is preliminary and subject to change to reflect the effect of the restatement of Qwest's financial statements for the years 2000, 2001 and 2002.

The [redacted] percent spread between Qwest's annual productivity during the past four years as shown in Confidential Attachment B and the productivity factor employed in the Price Cap Plan is calculated as follows:

Productivity factor adopted for the initial term of the plan	4.2%
Less average annual productivity from 1999 through 2002	([redacted]%)
Spread between anticipated and actual productivity	[redacted]%

Without doubt, many factors affected Qwest's actual productivity during the four-year period ending in 2002. However, Qwest is aware of two important factors have contributed to Qwest's productivity losses. The first is an unprecedented increase in telephone plant in service in Arizona. As line 9 of Confidential Attachment B shows, Qwest's Average Gross Plant in Service has grown 38.6% from $3,360 million in 1998 to $4,656 million in 2002. The second is an unprecedented loss of access lines in Arizona. Between February 2001 and March 2003, Qwest has suffered a net loss of over 238,000 Arizona access lines. The measurement of that loss includes both retail and wholesale access lines.
