

1 The Project involves the rebuilding of the existing Marana to Sandario 115 kV transmission line
2 along the same route it has occupied since 1961. The transmission line rebuild begins at the
3 existing WAPA Saguaro to Rattlesnake 115 kV transmission line just south of the intersection of
4 Trico Marana Road and North Trico Road. From there, the upgrade proceeds to the Applicant's
5 Marana Substation and then parallels North Trico Road to its junction with the Applicant's
6 existing Sandario 115 kV line located approximately one mile south of Manville Road.
