Re: Use of Effluent and Groundwater on Golf Courses and Ornamental Water Features;
Docket No. RW-00000B-07-0051

Dear Colleagues:

I am interested in gathering more information about the use of effluent and groundwater on golf courses and ornamental water features.

I believe a full discussion of policies, quantifiable impacts and benefits of effluent and groundwater management on golf courses and ornamental water features is warranted. The discussion should include specific policies for areas inside Active Management Areas (AMAs) as well as outside AMAs.

In addition, I would like to hear from various parties about whether the Arizona Department of Water Resources' (ADWR) current management plans would be a good model for Commission rules. I am open to input from all parties: golf courses, developers, resorts, water companies, Commission staff, and other affected parties.

In my opinion, the best way to collect more information is through the current CC&N generic docket. I would like to have an open and full discussion of all the issues through this forum. Thank you for your attention to this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeff Hatch-Miller".

Jeff Hatch-Miller, Commissioner
Arizona Corporation Commission
