Statement from Commission Chairman Bob Stump

PHOENIX, AZ—Chairman Bob Stump issued the following statement on today’s decision of the Commission:

“Solar power in Arizona is an American success story.

“It’s been eight years since the Renewable Energy Standard was implemented in Arizona. Let there be no failures of interpretation: The Commission today simply voted to enter into in-depth discussions on the best way to account for the energy that applies toward this standard.

“The Corporation Commission is committed to the goal of encouraging the growth of renewable energy in Arizona and enters into these discussions with an open mind and in good faith.

“As I emphasized in today’s Open Meeting, I implore all the parties to act in good faith and to refrain from demagoguing an issue of great importance to Arizonans.”
