TARIFF FORMAT

- A Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially, however, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between sheets 14 and 15 would be 14.1.
- B Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the ACC. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14.
- C Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
- D Check Sheets** - When a tariff filing is made with the ACC, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.)

3.4 Calculation of Distance

For services which are distance sensitive, usage charges are based on the airline distance between the serving wire center locations associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by BellCore (Bell Communications Research), in the following manner:

- Step 1:** Obtain the "V" and "H" coordinates for the serving wire center of the Customer's switch and the destination point.
- Step 2:** Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the Difference between the "H" coordinates.
- Step 3:** Square the differences obtained in Step 2.
- Step 4:** Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5:** Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6:** Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers of the call.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

SECTION 4 – INSTITUTIONAL CALLING SERVICES (CONT'D.)

(N)

4.2 Prepaid Institutional Collect Service

4.2.1 Description

Prepaid Institutional Collect Service provides an alternative payment arrangement for inmates in Confinement Institutions. This service enables end users to receive calls originating from confined persons and who cannot or who do not wish to have such calls billed through their own local exchange service provider.

With Prepaid Institutional Collect Service, a prepaid account is set up by the Company for the Customer who receives collect calls from an inmate in a confinement facility. Once an account is established, all collect calls from the confinement facility to the telephone number associated with the prepaid collect account are automatically processed as prepaid collect. If the payment into the account is provided via the Customer's credit card, credit verification procedures are carried out under the terms specified in Section 2. The Company does not engage in direct monetary transactions with the inmate.

Network usage is deducted from the Available Usage Balance in the account on a real time basis as the call progresses. All calls must be charged against an Account that has sufficient available balance. Calls in progress will be terminated by the Company if the balance on the Account is insufficient to continue the call. Customers are responsible for contacting the Company's Customer Service Department to obtain the Available Usage Balance remaining in the Prepaid Collect Account.

Payment for Prepaid Institutional Calling Services and any Available Usage in the Prepaid Account is refundable upon request by the called party. The Available Usage Balance expires twelve months from the date the last call is made on the prepaid account. No refunds of unused balances will be issued after the expiration date.

Prepaid Institutional Collect Service is available 24 hours a day, seven days per week. Access to telephone service by an inmate may be subject to time of day and usage restrictions imposed by individual Confinement Institutions. No minimum service period applies.

Network usage for Prepaid Institutional Calls is deducted from the Available Usage Balance in full minute increments. For debiting purposes, call timing is rounded up to the nearest one (1) minute increment. Usage charges are computed and rounded up to the nearest penny on a per call basis. Prepaid accounts may be replenished; the minimum initial deposit or replenishment amount is \$25.00; the maximum replenishment permitted is \$1000.
