ARIZONA CORPORATION COMMISSION

September 21, 2012

RE: Tucson Electric Power Company's 2011 Energy Efficiency Implementation Plan
E-01933A-11-0055

Dear Colleagues and Interested Parties:

I have been following the proceedings of this docket closely and I am cognizant of the complexity of this case.

I respect the need for Commissioners to be granted time to ponder any case fully and have their questions addressed prior to rendering any formal decision. This is not just a matter of a Commissioner exercising a procedural prerogative. Ratepayers deserve to have Commissioners that are fully informed prior to making important decisions.

That said, I am sensitive to delays in this critical matter.

It concerns me that this case has taken longer than most cases of this nature. Energy efficiency is an important resource and I do not take the implementation of this resource lightly. Yet I understand that some Commissioners believe this case requires additional time and evidence.

I remain hopeful that any outstanding questions can be answered swiftly so that this case may be resolved without further delay. Of course, I have not made any formal decision, and I look forward to hearing the case in a future open meeting.

Sincerely,

A handwritten signature in black ink, appearing to read "Bob Stump", written over a white background.

Bob Stump
Commissioner
