Tariff Format

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between page nos. 14 and 15 would be 14.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the Fourth Revised Page 14 cancels the Third Revised Page No. 14.
- C. Paragraph Numbering Sequence - There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:
 - 2
 - 2.1
 - 2.1.1
 - 2.1.1(A)
 - 2.1.1(A)(1)
 - 2.1.1(A)(1)(a)
 - 2.1.1(A)(1)(a)(1)
- D. Check Sheets - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

3.1.3 Excel's services are offered to Customers on a monthly basis.

3.1.4 Excel's services are offered to Customers twenty-four hours a day.

SECTION 3 - DESCRIPTION OF SERVICES, (CONT'D.)

3.2 Calculation of Distance

3.2.1 Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

3.2.2 The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved.

Formula:

$$\sqrt{\frac{|V_1 - V_2|^2 + |H_1 - H_2|^2}{10}}$$

3.3 Minimum Call Completion

Customers can expect a call completion rate of 98% during peak use periods for all Feature Group D Equal Access 1+ and 0+ Services. The call completion rate is calculated as the number of calls completed (including calls completed to a busy line or to a line which remains unanswered by the called party) divided by the number of calls attempted.

3.4 Rate Period Overlap

3.4.1 For messages which overlap one or more rate periods the rate in effect at the time of call origination in the originating area applies to the entire duration of that call.

3.4.2 Subject to the billing increments set forth in this tariff, plus any additional charges which may apply, long distance usage charges are based on the actual usage of Excel's service. Usage begins when the called party picks up the receiver. When the called party picks up timing is determined by hardware answer supervision. Chargeable time ends when either party "hangs up" thereby releasing the connection. Excel does not bill for uncompleted calls.

3.5 Service Area

The service area of Excel includes all Equal Access points in Arizona.

4.10 Excel Operator Services

The Company's Operator Services are available throughout the State of Arizona. Callers access the Company's Operator Services by dialing 0+ a 10 digit telephone number, 00 or a Company-provided access code or other Company-authorized access method plus the telephone number of the called station. Upon receipt of the call, the Company may verify the credit-worthiness of the designated billed party. When a payment method cannot be validated, or is unacceptable, callers may be required to select an alternative and acceptable means of payment. Total charges for use of this service include usage charges and an Operator Assistance Service Charge, as set forth below. An Operator Dialed Service Charge also applies to calls in which the caller has the capacity to dial the number, but has the operator dial instead. Usage charges are based upon the duration of a call, and are flat per minute based, 24 hours per day, 7 days per week, during all Time-of-Day Rate Periods. The Time-of-Day Rate Periods are defined as follows:

- Day Rates are applicable to calls placed Monday through Friday from 8:00 AM to, but not including, 5:00 PM.
- Evening Rates are applicable to calls placed Sunday through Friday from 5:00 PM to, but not including, 11:00 PM; and on Carrier Recognized Holidays, unless a lower rate would normally apply.
- Night/Weekend Rates are applicable to calls placed Sunday through Friday from 11:00 PM to, but not including, 8:00 AM the following day, and all day Saturday.

Chargeable time begins when the Company receives signaling to detect that the network connection between the calling station and the called station has been established. Chargeable time ends when either party "hangs up" thereby releasing the network connection. For collect calls, chargeable time begins when the called station accepts responsibility for payment of the charges associated with the call. All calls are measured and billed in one minute increments; fractional minutes of use are rounded up to the next full minute.

4.10.1 Operator Assistance Service Charges and Surcharge Descriptions

A Service Charge is applicable to Customer Dialed (Automated) Calling Card Station, Operator Assisted Calling Card Station, Operator Station-to-Station (including Sent Paid, Sent Collect, Third Number Billed or Calling Card), Person-to-Person (including Sent Paid, Sent Collect, Third Number Billed or Calling Card) and for Busy Line Verifications and Busy Line Interruptions. These charge(s) are in addition to the initial period and additional period per minute usage charges applicable to each call. When a call is subject to more than one Service Charge, only the highest Service Charge applies, unless indicated otherwise herein. Operator Assistance Service Charges vary depending upon the billing option selected by the caller. The following call placement options are available:

- A. Operator Station-to-Station - refers to when an end user requests operator assistance in reaching a telephone number and is willing to talk to anyone who answers. The call may be billed as Sent Paid (calling party pays for the call), Sent Collect (called party pays for the call), or may be billed to a Third Party Number or Calling Card. Sent Collect and Third Number Billed calls may not be allowed in locations where the Company does not have billing arrangement availability. To activate Station-to-Station Operator Services, the caller's dialing sequence could be: 0+ a 10 digit telephone number, or 00 (only), or any other Company-provided access method, to get an operator directly to request that a Station-to-Station call be placed.

4.10.1 Operator Assistance Service Charges and Surcharge Descriptions, (Cont'd.)

- B. Person-to-Person - refers to when an end user requests operator assistance in reaching a specific person, department, extension, office, etc. The operator dials the number and stays on the line until the requested party is reached and conversation begins. The call may be billed as Sent Paid (calling party pays for the call), Sent Collect (called party pays for the call), or may be billed to a Third Number or Calling Card. Sent Collect and Third Number Billed calls may not be allowed in locations where the Company does not have billing arrangement availability. To activate Person-to-Person Operator Services, the caller's dialing sequence could be: 0+ a 10 digit telephone number, or 00 (only), or any other Company-provided access method, to get an operator directly to request that a Person-to-Person call be placed.
- C. Busy Line Verification - refers to those instances where the Company will provide operator assistance to determine if there is conversation ongoing on a called station. A Service Charge is applied to all attempts to verify the condition of a customer line, busy talking, busy not talking (e.g., off hook), except attempts which are unsuccessful due to network equipment failure.
- D. Busy Line Interruption - refers to those instances where the Company operator will interrupt an ongoing conversation on a called station. A charge will apply each time the Company operator attempts the emergency interruption whether or not the interruption is successful. A Busy Line Verification must be made and its service charge applied before an Emergency Interruption can be attempted. Once an operator has verified the line, and the called party has agreed to accept the interruption, the Customer is provided the option of completing an operator assisted call to the called station without hanging up or originating a separate call. Customers may accept or refuse the operator's offer to complete the call. Calls completed with the operator's assistance will be charged an additional Service Charge under Station-to-Station or Person-to-Person, as applicable. If the operator dials or completes the call to the verified telephone number for the Customer, the Operator Dialed Surcharge will also apply.

An Operator Dialed Service Charge also applies to calls in which the caller has the capacity to dial the number, but has the operator dial instead. Usage charges are based upon the duration of a call, and are flat per minute based, 24 hours per day, 7 days per week, during all Time-of-Day Rate Periods. The Time-of-Day Rate Periods are defined as follows:

- Day Rates are applicable to calls placed Monday through Friday from 8:00 AM to, but not including, 5:00 PM.
- Evening Rates are applicable to calls placed Sunday through Friday from 5:00 PM to, but not including, 11:00 PM; and on Carrier Recognized Holidays, unless a lower rate would normally apply.
- Night/Weekend Rates are applicable to calls placed Sunday through Friday from 11:00 PM to, but not including, 8:00 AM the following day, and all day Saturday.

Chargeable time begins when the Company receives signaling to detect that the network connection between the calling station and the called station has been established. Chargeable time ends when either party "hangs up" thereby releasing the network connection. For collect calls, chargeable time begins when the called station accepts responsibility for payment of the charges associated with the call. All calls are measured and billed in one minute increments; fractional minutes of use are rounded up to the next full minute.

5.10.1 Operator Assistance Service Charges and Surcharge Descriptions

A Service Charge is applicable to Customer Dialed (Automated) Calling Card Station, Operator Assisted Calling Card Station, Operator Station-to-Station (including Sent Paid, Sent Collect, Third Number Billed or Calling Card), Person-to-Person (including Sent Paid, Sent Collect, Third Number Billed or Calling Card) and for Busy Line Verifications and Busy Line Interruptions. These charge(s) are in addition to the initial period and additional period per minute usage charges applicable to each call. When a call is subject to more than one Service Charge, only the highest Service Charge applies, unless indicated otherwise herein. Operator Assistance Service Charges vary depending upon the billing option selected by the caller. The following call placement options are available:

- A. Operator Station-to-Station - refers to when an end user requests operator assistance in reaching a telephone number and is willing to talk to anyone who answers. The call may be billed as Sent Paid (calling party pays for the call), Sent Collect (called party pays for the call), or may be billed to a Third Party Number or Calling Card. Sent Collect and Third Number Billed calls may not be allowed in locations where the Company does not have billing arrangement availability. To activate Station-to-Station Operator Services, the caller's dialing sequence could be: 0+ a 10 digit telephone number, or 00 (only), or any other Company-provided access method, to get an operator directly to request that a Station-to-Station call be placed.

5.10.1 Operator Assistance Service Charges and Surcharge Descriptions, (Cont'd.)

- B. Person-to-Person - refers to when an end user requests operator assistance in reaching a specific person, department, extension, office, etc. The operator dials the number and stays on the line until the requested party is reached and conversation begins. The call may be billed as Sent Paid (calling party pays for the call), Sent Collect (called party pays for the call), or may be billed to a Third Number or Calling Card. Sent Collect and Third Number Billed calls may not be allowed in locations where the Company does not have billing arrangement availability. To activate Person-to-Person Operator Services, the caller's dialing sequence could be: 0+ a 10 digit telephone number, or 00 (only), or any other Company-provided access method, to get an operator directly to request that a Person-to-Person call be placed.
- C. Busy Line Verification - refers to those instances where the Company will provide operator assistance to determine if there is conversation ongoing on a called station. A Service Charge is applied to all attempts to verify the condition of a customer line, busy talking, busy not talking (e.g., off hook), except attempts which are unsuccessful due to network equipment failure.
- D. Busy Line Interruption - refers to those instances where the Company operator will interrupt an ongoing conversation on a called station. A charge will apply each time the Company operator attempts the emergency interruption whether or not the interruption is successful. A Busy Line Verification must be made and its service charge applied before an Emergency Interruption can be attempted. Once an operator has verified the line, and the called party has agreed to accept the interruption, the Customer is provided the option of completing an operator assisted call to the called station without hanging up or originating a separate call. Customers may accept or refuse the operator's offer to complete the call. Calls completed with the operator's assistance will be charged an additional Service Charge under Station-to-Station or Person-to-Person, as applicable. If the operator dials or completes the call to the verified telephone number for the Customer, the Operator Dialed Surcharge will also apply.

5.20 Excel Prime Business Select 4 Service

Excel Prime Business Select 4 Service is a combined inbound, outbound and calling card service offered to business Customers. Customers are billed at per minute rates based on Combined Monthly Usage volumes, and discounted rates are applied based upon the Customer's billed monthly usage. Combined Monthly Usage is defined as the Customer's billed usage for a monthly billing period for the combined total of interstate, intrastate, international and service calling card usage for a month billing period. Directory Assistance charges, monthly recurring charges, service fees, surcharges and taxes are not included in the determination of the Customer's Combined Monthly Usage.

Customers to this service offering commit to Combined Monthly Usage of \$100.00, hereinafter referred to as the \$100.00 Monthly Minimum Commitment. In the event Customer does not meet the \$100.00 Monthly Minimum Commitment during any monthly invoice period, the Customer will be responsible for paying a deficiency charge for that invoice period. The Customer's deficiency charge will be the difference between the Customer's \$100.00 Monthly Minimum Commitment and the Customer's actual Combined Monthly Usage.

Customers subscribing to this service must commit to a term of 12 months. A service term begins on the first day of the month following service enrollment. When the Customer's 12-month service term expires, the Customer's service will automatically renew for another 12-month period, unless the Company receives in writing a notice of non-renewal during the period between 60 and 30 days prior to the end of the Customer's 12-month term period.

In the event a Customer terminates service with the Company prior to the end of the 12-month Term Commitment Period, ~~or in the event that the Company terminates service based on the~~ Customer's default, the Customer will be responsible for paying a Termination Charge equal to the Customer's \$100.00 Monthly Minimum Commitment, multiplied by the number of months remaining in the Customer's agreed 12-month Term Commitment period.
