SECTION 3 – VARTEC DESCRIPTION OF SERVICES

3.1 General

The Carrier endeavors to provide high quality service. Service is available 24 hours per day, 7 days a week, subject to routine maintenance and outages beyond the control of the Carrier. Carrier's switching equipment is designed and engineered to provide high quality transmission of voice and data with a minimum level of impairment such as noise and echo. However, overall quality may vary somewhat due to the variability in quality of the connections provided by the local telephone companies and other interexchange carriers which is beyond the Company's control.

3.1.1 Travel Card Availability

The VT Travel Card products identified throughout this tariff are only available to existing Customers who subscribed to a Travel Card product prior to July 1, 2004. Customers with active Travel Card accounts as of July 1, 2004 will continue to receive Travel Card service as set forth in this tariff.

3.2 Timing of Calls

3.2.1 Long distance usage charges are based on the actual usage of VT's network. No charge will apply to incompleting calls, which include "ring busy" and "ring no answer calls", and such incompleting calls will not be knowingly charged to the customer, and if charged in error, will be refundable to the customer. VT will determine that a call has been established by signal from the local telephone company. Where such signaling is unavailable, VT will determine that an initiated call has been answered after 30 seconds of ring time. A call is terminated when either party disconnects from the call.

3.2.2 Unless otherwise specified in this tariff, the minimum call duration for billing purposes is one (1) minute.

3.2.3 Unless otherwise specified in this tariff, usage is measured and rounded to the higher full minute for billing purposes.

3.2.4 When answer supervision is unavailable and VT has received a reasonable claim from the end user for a refund of VT's charges for an uncompleted call, VT will reimburse the end user for the charges that VT has billed for that call.

3.4 Calculation of Distance

- 3.4.1 Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.
- 3.4.2 The Rate Centers of a call are determined by the area codes and exchanges of the origination and destination points.
- 3.4.3 The distance between the Rate Center of the origination point and that of the destination point is calculated by using the "V" and "H" coordinates found in AT&T FCC Tariff No. 10, in the following manner:

Step 1 - Obtain the "V" and "H" coordinates for the Rate Centers of the origination point and the destination point.

Step 2 - Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the difference between the "H" coordinates.

Step 3 - Square the differences obtained in Step 2.

Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the Rate Centers.

SECTION 5 - CLEAR CHOICE COMMUNICATIONS DESCRIPTION OF SERVICES

5.1 General

The Carrier endeavors to provide high quality service. Service is available 24 hours per day, 7 days a week, subject to routine maintenance and outages beyond the control of the Carrier. Carrier's switching equipment is designed and engineered to provide high quality transmission of voice and data with a minimum level of impairment such as noise and echo. However, overall quality may vary somewhat due to the variability in quality of the connections provided by the local telephone companies and other interexchange carriers which is beyond the Company's control.

5.1.1 Travel Card Availability

The CCC Travel Card products identified throughout this tariff are only available to existing Customers who subscribed to a Travel Card product prior to July 1, 2004. Customers with active Travel Card accounts as of July 1, 2004 will continue to receive Travel Card service as set forth in this tariff.

5.2 Timing of Calls

- 5.2.1 Long distance usage charges are based on the actual usage of CCC's network. No charge will apply to incompleting calls, which include "ring busy" and "ring no answer calls", and such incompleting calls will not be knowingly charged to the customer, and if charged in error, will be refundable to the customer. CCC will determine that a call has been established by signal from the local telephone company. Where such signaling is unavailable, CCC will determine that an initiated call has been answered after 30 seconds of ring time. A call is terminated when either party disconnects from the call.
- 5.2.2 Unless otherwise specified in this tariff, the minimum call duration for billing purposes is 1 minute.
- 5.2.3 Unless otherwise specified in this tariff, usage is measured and rounded to the higher full minute for billing purposes.
- 5.2.4 When answer supervision is unavailable and CCC has received a reasonable claim from the end user for a refund of CCC's charges for an uncompleted call, CCC will reimburse the end user for the charges that CCC has billed for that call.

5.4 Calculation of Distance

- 5.4.1 Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.
- 5.4.2 The Rate Centers of a call are determined by the area codes and exchanges of the origination and destination points.
- 5.4.3 The distance between the Rate Center of the origination point and that of the destination point is calculated by using the "V" and "H" coordinates found in AT&T FCC Tariff No. 10, in the following manner:

Step 1 - Obtain the "V" and "H" coordinates for the Rate Centers of the origination point and the destination point.

Step 2 - Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the difference between the "H" coordinates.

Step 3 - Square the differences obtained in Step 2.

Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.

Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the Rate Centers.
