**TARIFF FORMAT**

Sheet Numbering. Sheet numbers appear in the upper right hand corner of the sheets. Sheets are numbered sequentially. From time to time new sheets may be added to the tariff. When a new sheet is added between existing sheets, a decimal is added to the preceding sheet number. For example, a new sheet added between sheets 5 and 6 would be numbered 5.1.

Sheet Revision Numbers. Revision numbers also appear in the upper right corner of sheets. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4<sup>th</sup> Revised Sheet No. 24 cancels the 3<sup>rd</sup> Revised Sheet No. 24.

Paragraph Numbering Sequence: There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level, as shown by the following example:

2  
2.1  
2.1.1  
2.1.1.A  
2.1.1.A.1  
2.1.1.A.1.(a)  
2.1.1.A.1.(a).I  
2.1.1.A.1.(a).I.(i)  
2.1.1.A.1.(a).I.(i).(1)

Check Sheets: When a tariff filing is made with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross-reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revisions. All revisions made in a given filing are designated by an asterisk (\*). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current one on file with the Commission.

## SECTION 2 – RULES AND REGULATIONS

### 2.1 Undertaking of Company

The Company's services are furnished for telecommunications services originating and/or terminating in any area within the State of Arizona.

The Company provides RF Transport Services to Customers to enable the direct offering of voice communications and data services. Services are offered via the Company's facilities (whether owned, leased, or under contract) in combination with resold services provided by other certificated carriers. The Company is responsible under this tariff only for the services and facilities the Company provides hereunder.

The Company's services are provided on a monthly basis unless otherwise provided, and are available twenty-four (24) hours per day, seven (7) days per week, subject to the availability of necessary service, equipment and facilities and the economic feasibility of providing such necessary service, equipment, and facilities.

### 2.2 Application for Service

Service may be initiated only based on a written agreement between the Company and the Customer. To initiate a service request, the Customer must provide the following information: the Customer's name; an address to which the Company shall provide service; and a billing address (if different). The service application does not itself bind either the Customer to subscribe to the service or the Company to provide the service.

Request for service under this Tariff will authorize the Company to conduct a credit search on the Customer. The Company reserves the right to refuse service on the basis of credit history, and to refuse further service due to late payment or nonpayment by the Customer. Potential customers who are denied service must be given the reason for the denial in writing within ten (10) days of service denial.

---

**2.3    Contract or Agreements**

In lieu of the rates otherwise set forth in this Tariff, rates and charges, including installation, special construction, and recurring charges, may be established at negotiated rates on an Individual Case Basis (ICB), taking into account such factors as the nature of the facilities and services, the costs of construction and operation, and the length of service commitment by the Customer, as long as the rates and charges are not less than Carrier's costs of providing the service. Such arrangements shall be considered Special Pricing Arrangements, the terms of which will be set forth in individual contracts or Customer Term Agreements. Specialized Pricing Arrangement rates or charges will be made available to similarly-situated Customers on comparable terms and conditions.

Upon reasonable request, Carrier will make the terms of these contracts available to the Commission and its staff for review on a confidential and proprietary basis.

**2.4    Deposits**

The Company may, at its sole discretion, require a deposit or usage prepayment as a condition to receiving service or additional service. The Company reserves the right to review an applicant's or a Customer's credit history at any time to determine if a deposit is required.

In the event the Customer fails to establish a satisfactory credit history, deposits are a form of security that may be required from Customers to ensure payment of bills.

Deposits shall be no greater than twice the estimated average monthly bill for the class of service applied for.

Deposits will be refunded with interest within thirty (30) days after discontinuance of service or after twelve (12) months of service, whichever comes first. Interest will accrue at an annual rate of six percent (6%) on the amount deposited that is held over twelve (12) months. The Company will credit such interest to each eligible depositor by paying such interest in cash or deducting it from the amount of a bill for service.

**SECTION 3 – DESCRIPTION OF SERVICE OFFERED**

**3.1 Application of Rates**

RF Transport Services rates apply to service furnished to business customers. RF Transport Services are not available to residential customers.

**3.2 RF Transport Service**

**A. General service offerings and limitations**

RF Transport Services utilize optical technology, including multi-wavelength optical technology over dedicated transport facilities to provide Customers with links to emit RF coverage.

RF Transport Services connect Customer-provided wireless capacity equipment to Customer-provided or Company provided bi directional RF-to-optical conversion equipment at a hub facility. The hub facility can be Customer or Company provided. The conversion equipment allows the Company to accept RF traffic from the Customer and then send bi-directional traffic transmission across the appropriate optical networks. At the remote end, Customer or Company provided RF-to-optical conversion equipment allows bi-directional conversion between optical signals and RF signals. RF signals can be received and transmitted at this remote node. Hence the Company provides optical transit services for RF signals.

The furnishing of RF Transport Services requires certain physical arrangements of equipment and facilities of the Company and other entities and is subject to the availability of such equipment and facilities and the economic feasibility of providing such necessary equipment and facilities and the RF Transport Services.
