If applicable, in the space below please provide a description for all un-metered water use along with amounts: Flushing = 90,000 gallons, Construction = 2,000 gallons, Fire Dept = 0 gallons

Water withdrawn - Total gallons of water withdrawn from pumped sources.
 Water sold - Total gallons from customer meters, and other sales such as construction water.
 Water delivered (sold) to other systems - Total gallons of water delivered to other systems.
 Water received (purchased) from other systems - Total gallons of water purchased/received from other systems.
 Water received (purchased) from other systems - Total gallons of water purchased/received from other systems.
 Setimated authorized use - Total estimated gallons from authorized metered or unmetered use. Authorized uses such as flushing (mains, services and hydrants) draining/cleaning tanks, process, construction, fire fighting, etc. Non-authorized use (real losses) are service line breaks and leaks, water main breaks, meter inaccuracies and theft.
 Enter the total purchased power costs for the power meters associated with this system.
 Tenter the total purchased kWh used by the power meters associated with this system.

If applicable, in the space below please provide a description for all un-metered water use along with amounts:

Instructions: Fill out the Grev Cells with the relevant information. Input 0 or none if there is nothing recorded in that account or there is no applicable information to report.

1 Water withdrawn - Total gallons of water withdrawn from pumped sources.
2 Water sold - Total gallons from customer meters, and other sales such as construction water.
3 Water delivered (sold) to other systems - Total gallons of water delivered to other systems.
4 Water received (purchased) from other systems - Total gallons of water purchased/received from other systems.
#VALUE!
6 Enter the total purchased power costs for the power meters associated with this system.
7 Enter the total purchased kWh used by the power meters associated with this system.

Water Utility Plant Description (Continued)

For the following three items, list the utility owned assets in each category for each system.

TREATMENT EQUIPMENT:	Two Chlorinators
STRUCTURES:	26 x 38 foot office building at 1313 Treasure Road (wellsite 16); steel frame with corrugated steel siding and roof; 4 x 8 foot treatment building at wellsite 5; wood frame with wood siding.
OTHER:	N/A

Provide a calculation used to determine the value of one water equivalent residential connection (ERC).

Use one of the following methods:

- If actual flow data are available from the preceding 12 months, divide the total annual single family residence (SFR) (a) gallons sold by the average number of single family residence customers for the same period and divide the result by If no historical flow data are available, use: (b)
- ERC = (Total SFR gallons sold (Omit 000) / 365 days / 350 gallons per day)
