CUSTOM CALLING FEATURES (CCF)

31.0 CONDITIONS (Cont'd)

- 31.4 When a service is programmed for both Call Waiting and Call Forwarding, only one of the two may be activated at any one time.

32.0 DEFINITIONS

32.1 Call Forwarding

T

Permits transfer of all incoming calls automatically to any dialable number. The number can be selected by the customer each time Call Forwarding is activated or the call directed to the previously selected number. If the alternate location is not a free call the customer will be billed for each call forwarded.

32.2 Call Waiting

A distinctive tone informs the telephone user that another call has been placed to his line. By briefly depressing the hook switch, the user will be connected to the second caller while holding the first, subsequent depressions of the hook switch will allow the user to alternate between callers.

32.3 Call Waiting ID

N

A customer with Caller ID may also receive name and/or number information on a call that is waiting. The customer must have the appropriate customer-provided equipment (CPE).

N

32.4 Caller ID - Name and Number

N

Enables a subscriber to identify the calling party by a displayed name and number before the call is answered. The displayed name is the name associated with the Calling Party Number (CPN) as shown on Company records. The Company does not assure name accuracy. When a Caller ID equipped line is on-hook, the CPN and Calling Party Name (CNAM) are transmitted across the line during the silent interval between the first and second ring. Subscribers to this service must provide and connect their own compatible CPE.

N

32.5 Conference Calling

T

Permits a telephone user to add a third party to an existing local or long distance call. It will also permit a telephone user to consult privately with a third party while holding the original call.

CUSTOM CALLING FEATURES (CCF)

32.0 DEFINITIONS (Cont'd)

32.6 Continuous Redial

Allows a customer to dial a code that will cause the feature to automatically redial the last number the customer dialed. If the called number is busy, the feature will redial the called number for a limited period of time. A distinctive ring alerts the customer when the called number becomes available.

32.7 Custom Ringing

Allows two to three directory numbers to be assigned to the same exchange access line which will allow the customer to receive calls on up to three separate numbers without installing additional lines. The customer is allowed the economy of one outgoing line and the party identification of three incoming lines; however, the incoming lines cannot be used concurrently. Each number rings with a different ringing cadence.

32.8 Fixed Calling

After dial tone is obtained, if the caller does not commence dialing within a predetermined length of time, a call will automatically be placed to a number previously selected by the subscriber.

32.9 Last Call Return

Allows a subscriber to dial a code that will cause the feature to automatically redial the number of the last incoming call to that line, whether the call was answered or not. If the calling party's number is blocked by the calling party, the service will not return the call. If the called number is busy, the feature will redial the called number for a limited period of time. A tone alerts the customer when the called line is available.

32.10 Selective Call Acceptance

Allows the subscriber to only accept incoming calls made by a special list of telephone numbers. Any directory number not on that list is routed to announcement and rejected. The calling party not on the acceptance list receives an announcement stating that the call is not presently being accepted by the called party. Subscribers can review and change the list of accepted directory numbers as desired.

32.11 Selective Call Forwarding

Allows a subscriber to assign selected callers' telephone numbers to a special list. Incoming calls placed to the customer from telephone numbers on that list will automatically be forwarded to a pre-defined telephone number. All other calls will be handled normally.

ORIGINAL

CUSTOM CALLING FEATURES (CCF)

32.0 DEFINITIONS (Cont'd)

The calling party on the rejection list receives an announcement stating the call is not presently being accepted by the called party. A subscriber may also reject future calls from the most recent call received by dialing a code after completing the call.

N

N

32.13 Speed Calling

Permits placing local and long distance calls to preselected telephone numbers by dialing an abbreviated code. To add a number to the calling list the customer uses his own telephone. Speed calling 8 numbers has the capacity for storing up to 8 directory numbers. Speed Calling – 30 numbers has the capacity for storing up to 30 directory numbers.

MT

MT  
MT

32.14 Telemarketing – Do Not Disturb

Allows a customer to deter sales and telemarketing calls received by the customer. A recorded message informs the caller, "You have called a number which does not accept calls from telemarketers. All other callers may press '1' if they wish to complete the call." This feature can be activated and deactivated by the subscriber by entering Do Not Disturb feature access codes.

N

32.15 Unidentified Call Rejection

Allows subscribers to reject calls from parties who have a privacy feature that prevents the disclosure of the calling party number. Incoming calls with a calling party number marked as private are routed to a denial announcement. Incoming calls with a calling party number marked as public and incoming calls without calling party number information remain unaffected. The customer at any time may activate or deactivate this feature, if desired.
